

# Graffiti Remover Green

Graffiti remover in gel form for surfaces with industrial paint

## Fields of application

GR Green is used to remove graffiti on surfaces with industrial paint such as sheet metal facades, garage doors, sheet metal and steel containers etc.

Also works well on absorbent material.

## Advantages

- Effective on spray paint and marker graffiti.
- Gentle on underlying surfaces and materials
- Subtle scent
- Gel
- Economical

## Application instructions

Apply the product with a paintbrush, brush or cloth.

Allow the product to work for 2 - 10 minutes depending on the nature of the graffiti.

Use a brush or paintbrush on the surface to ensure that the paint is dissolved.

Then wash off the surface thoroughly using a hot water pressure washer and low pressure.

For thick layers of graffiti, it can be necessary to repeat the treatment.

## Dosage

The product is used in concentrated form.

Consumption approx. 0.3 - 0.5 litre/m<sup>2</sup>.

## Packaging

5 litre bucket - 15 litre bucket
