

# Graffiti Remover

## Graffiti remover in practical spray bottle

### Fields of application

Graffiti Remover is used to remove graffiti on hard, colourfast surfaces such as laminate, glass, metal, tiles etc.

### Advantages

- Effective against marker graffiti, silver/gold pens and ink pens
- Also removes lighter "shadows" left by marker graffiti
- Gentle on underlying surfaces and materials
- Subtle scent
- Fast-acting

### Application instructions

Spray the product on a clean cloth or directly on the graffitied surface and wipe away the graffiti.

Then wipe off the surface with a damp cloth or glass cleaner.

For more severe graffiti, allow the product to work for 1-5 minutes and then wipe off the surface with a cloth or white scouring pad - then wipe off/wash the surface carefully with damp cloth or glass cleaner so that the product does not affect the underlying material. NB! Check that the material can tolerate the product. Not for use on plexiglass!

### Dosage

The product is used in concentrated form.  
Consumption approx. 50-100 ml/m<sup>2</sup>.

### Packaging

500 ml spray bottle
