

Truck Wash

Washing trucks/large vehicles

Fields of application

Truck Wash is a highly alkaline soap that dissolves oil residue, asphalt stains, salt layers and at the same time is gentle on plastic and rubber. This means you get a powerful degreaser that can be safely used to wash tyres, engines and washing the entire vehicle before polishing and waxing.

Advantages

- Extra powerful high foaming washing agent.
- Dissolves oil, soot, traffic grime, suitable for high-pressure, brush and automated vehicle washers.
- Cleans trucks, forklifts, vans, tankers etc..
- Use a foam lance if you want heavy foaming.

Application instructions

Adapted for high-pressure, brush and automated washing plants but can also be used for manual washes. Releases and removes contaminants. Highly concentrated and should be diluted with water according to the degree of soiling and the temperature.

Dosage

Car	1:10	-	1:50
Truck/train/metro	1:5	-	1:25
Construction equipment	1:5	-	1:20
Industrial wash	1:5	-	1:25

Use warm water for enhanced effect.

Take care with all painted, varnished and aluminium surfaces.

Packaging

25 litre container - 200 litre barrel - 600 litre IBC - 1000 litre IBC
