WHAT WE DO

YOUR RELIABLE PARTNER FOR CLEANING AND MAINTENANCE

Blue & Green AB is a strong and competent partner specialized in products for cleaning, graffiti removal, prevention, and maintenance of trains, subways, buses, cars and other vehicles. We offer one of the widest and most complete product ranges covering every phase of cleaning and maintenance, from washing and cleaning to impregnation and protection.

Our offer

- High-quality products at competitive prices, designed to minimize environmental impact.
- Solutions that ensure the safety and well-being of personnel handling the products.
- Direct access to extensive knowledge and experience from our specialists in the development, production and sale of effective cleaning products across Europe.
- Products that are approved and certified by leading environmental bodies.

Exterior Cleaning

Our exterior cleaning products effectively remove traffic film, iron and brake dust, asphalt, insects, and general grime, leaving surfaces both clean and well-protected. The surfaces are left looking nice and shiny, while they get the best possible protection.

Interior Cleaning

Our interior cleaning products offer a range of environmentally friendly and effective cleaning products for windows, floors and textiles. All surfaces will be completely clean, ensuring a pleasant experience for staff and passengers.

Graffiti removal

When you need to remove graffiti quickly, easily and effectively, we have several effective products that quickly remove both graffiti and shadows, while treating the surface so that future graffiti has a harder time sticking.

Car care and car wash

We offer a wide range of car care products for professionals. The products cover the various needs needed for effective but simple care of vehicles – including cars, boats, caravans and motorcycles. Our car shampoos, degreasers, and other cleaning products are specially developed to provide a shiny and protected surface.

SUSTAINABILITY AND ENVIRONMENTAL RESPONSIBILITY

LEADER IN SUSTAINABILITY AND ENVIRONMENTAL RESPONSIBILITY

At Blue & Green AB, sustainability is at the core of our business strategy. We strive to minimize our environmental impact and create long-term value for our customers, employees, and society at large. Our sustainability work is integrated into all aspects of our business, from product development to supply chain and customer service..

Sustainability goals and results

- **Reduced carbon dioxide emissions** – We have reduced our carbon dioxide emissions in recent years by optimizing our production processes and using renewable energy.
- **Climate impact** – From 2024, the carbon dioxide baseline calculation is made using the GHG protocol standard. Categories covered: Scope 1, Scope 2, Scope 3.
- **Eco-labelled products** – 46% of the cleaning products we sell are eco-labelled.
- **Energy consumption** – Over the past three years, we have cut energy consumption per liter of product by 30% through efficient management systems in our production facility.
- **No discharges to water** – Our production has no drains, which means that we do not discharge anything into the drain.

Engagement and Certifications

- We are proud to be certified according to ISO 14001 for environmental management and ISO 9001 for quality management, which confirms our commitment to sustainability and quality.
- Our team regularly participates in training and workshops to stay up to date on the latest sustainability practices and innovations.
- We work actively with our suppliers to ensure that our entire supply chain follows sustainable and ethical guidelines.
- We aim for 100% of our company cars to be electric in 2024.
- We strive to increase the proportion of renewable organic raw materials in our products.

SUSTAINABILITY GOALS AND RESULTS

LINKED TO THE UN'S GLOBAL GOALS - AGENDA 2030

GLOBAL GOALS 2015-2030

Before the global goals came in 2015, there were eight millennium goals. During a UN conference in Rio de Janeiro in 2012, world leaders decided to set new goals. In September 2015, the UN decided that Agenda 2030 will become a reality by developing the 17 global goals and the 169 sub-goals. All goals are important for creating sustainable development.

Below are our sustainability goals and results linked to the UN's goals.

THE GLOBAL GOALS

Sustainability goals and results

- **Capacity** – We have increased our production capacity and are now using our resources more efficiently. *Contributes to UN Goal 9.*
- **Inventory capacity** – We have optimized our inventory to ensure we can meet demand without overstressing our resources. *Supports UN Goal 9.*
- **Recipes/Inventions** – We constantly develop new and innovative products that are both efficient and environmentally friendly. *Contributes to UN Goal 13 and Goal 15.*
- **Employees** – We protect the health and safety of our employees by offering a safe and healthy work environment. *Contributes to UN Goal 3 and Goal 8.*
- **Accidents** – We work continuously to reduce the number of workplace accidents by implementing strict safety procedures. *Supports UN Goal 8.*
- **Stock turnover** – We have improved our stock turnover to ensure that our products are always fresh and of the highest quality. *Supports UN Goal 8.*
- **Water resources** – We do not release any waste water from our production, which helps protect marine ecosystems. *Supports UN Goal No. 14.*
- **Waste production** – We have reduced the amount of waste from our production by reusing and recycling materials. *Supports UN Goal 12.*

More initiatives

- **Project Clean Start** – This aims to lift Blue & Green's IT environment to the cloud. BC SaaS with operational start on February 1, 2024 and remaining infrastructure planned later in 2024. *Contributes to UN Goal No. 9.*
- **Environmental impact assessment (EIA)** – Blue & Green AB has carried out an extensive environmental impact assessment to ensure that our operations are conducted in an environmentally friendly manner. *Supports UN Goal 12.*
- **Carbon Baseline Report** – We recently completed a Carbon Baseline Report to map our carbon emissions. This initiative helps us identify areas where we can make further improvements to reduce our environmental impact. *Contributes to UN Goal No. 13.*
- **Fossil-free Sweden/Commercial car challenge** – This means that companies lease green cars. *Supports UN Goal 11.*
- **Climate agreement with Landskrona City** – Company cars must be 100% electric. *Contributes to UN Goal 7.*
- **Optimizing transport** – We work to optimize our transport to reduce the environmental impact. *Supports UN Goal 13.*
- **Increase the proportion of renewable organic raw materials** – We strive to increase the proportion of renewable organic raw materials in our products. *Contributes to UN Goal No. 15.*

PRIVATE LABEL

YOUR PARTNER FOR PRIVATE LABEL, WHITE LABEL AND LEGO PRODUCTION

We offer flexible and tailored solutions to meet customers' specific needs within private label, white label, and contract production. We pride ourselves on offering high-quality products and services that help your brand grow and prosper.

Private Label

With our private label service, you can create and market your own unique products under your own brand name. We work closely with you to develop products that meet your specific requirements and standards. This includes everything from product development and design to production and packaging. Private label gives you full control over the design and quality of the product, which enables you to differentiate your brand on the market.

White Label

The white label service means that we provide finished products that you can label with your own brand. Choose from more than 200 formulations. These products are already developed and tested, enabling you to quickly and easily bring them to market. White label is a cost-effective alternative for companies that want to expand their product range without having to invest in product development and manufacturing.

Contract manufacturing

Contract manufacturing means that we manufacture products for you according to your specifications and requirements. You provide the design and specifications, and we take care of the manufacturing. This is an ideal solution for companies that want to outsource production to focus on other core activities such as marketing and sales. Our contract manufacturing offers flexibility and allows you to leverage our manufacturing expertise and capacity.

WAREHOUSING & LOGISTIC

EFFICIENT AND RELIABLE WAREHOUSING AND LOGISTICS SOLUTIONS

We offer comprehensive warehousing and logistics solutions designed to meet our customers specific needs. Our modern facility in Landskrona is strategically located and stocking takes place in Malmö to ensure fast and efficient distribution across Europe.

Storage

Our secure, efficient storage facilities are equipped with advanced warehouse management systems, ensuring optimal conditions for your products. We continuously monitor stock levels to ensure we can meet your needs without delay.

Logistics

We provide fast, reliable logistics solutions to ensure your products reach customers quickly and in perfect condition. We offer flexible transport options and work with leading logistics partners to ensure your goods are delivered on time and in perfect condition. We can also offer direct deliveries to your end customers with anonymous senders, giving you the opportunity to focus on your core business.

Customized Solutions

We understand that each customer has unique needs, which is why we offer customized warehousing and logistics solutions. Whether you need help managing seasonal peaks in demand or you want to optimize your supply chain, we can offer solutions tailored to your specific requirements.

PRODUCTION AND EFFICIENCY

ADVANCED PRODUCTION CAPACITY AND EFFICIENCY

We are proud of our advanced production capabilities and our commitment to delivering high quality products to our customers. We recently obtained a permit allowing us to increase our manufacturing capacity to 8,000 tons annually. This is a significant increase from our previous capacity and enables us to meet the increased demand for our products.

To support this increased capacity, we have made several strategic investments to improve the efficiency of our production. We have upgraded our production equipment and implemented advanced inventory management systems to ensure our products are manufactured and stored under optimal conditions. These investments have not only increased our production capacity but also improved our ability to deliver products quickly and efficiently to our customers.

Another important aspect of our business is the traceability of our products. We have implemented robust traceability systems that enable us to follow each product from raw material to finished product. This ensures that we can guarantee the quality and safety of our products and gives our customers complete visibility into our production process.
