## Floor & Wall Coating High Gloss/Medium Gloss

High-tech coating for linoleum, plastic and rubber floors. The product has excellent chemical resistance properties with high scratch and wear resistance, but also with permanent elasticity. Repeated treatment is possible at any time without stripping. With new technology, ink and graffiti can be easily removed repeatedly, without affecting the surface properties. The product is available with different gloss: high, medium and low gloss.

High Gloss            3871055 – 0,5L  
                                 3871010 – 10L  
Medium Gloss        3871082 – 0,5L

## Glass Coating

Glass Coating is a treatment for front windows on trains and buses etc. The product has excellent chemical resistance properties and is easy to apply. High weather resistance along with E2C (easy to clean) properties reduces cleaning costs and washer fluid.

275025 – 25L  
3871054 – 0,5L

## Graffiti Shield

Graffiti Shield is a water-based wax emulsion that functions as an anti-graffiti coating and can be used on most surfaces including brick, concrete, granite, sandstone, limestone, plaster etc.

301005 – 5L  
301025 – 25L

## Graffiti Shield Color Betong

Graffiti Shield Colour is a pigmented water-based wax emulsion that can be used as a combined anti-graffiti coating and coverage product on trains, in underpasses and overpasses.

305111 – 10L

## Interior Coating

A high performance singlecomponent coating that can be used on most plastic surfaces. It is a durable product with high resistance to peeling, flaking and chemical agents that extends the life of plastic surfaces. Interior Coating meets DB AG (Deutsche Bahn AG) requirements for permanent graffiti protection, which makes it the natural choice to protect e.g. interior surfaces of trains, metros, trams and buses. Marker, spray and ink paint can be easily and simply removed repeatedly without affecting the surface.

3871053 – 0,5L

## SC Oleo

A water-based sealing agent used for the sealing of porous facade surfaces, roofs and concrete floors where the sealing should resist and repel water, oil, grease, urine, algae, moss and chewing gum.

285025 – 25L

## SC Perma

A 1K permanent graffiti protection product that can be used on concrete, brick, wood and metal.

- ✓ UV resistant and heat resistant
- ✓ Open diffusion/breathability
- ✓ Low VOC content
- ✓ Excellent elastic properties, even at low temperatures
- ✓ High water repellent effect
- ✓ The product can be applied again on already treated surfaces
- ✓ Can be coloured in various shades
- ✓ Time-saving and economical to use.
- ✓ Clean graffiti with clean water and approx. 100 bar pressure
- ✓ No problems with stubborn "graffiti shadows"

410009 – 10L

## Silane DC 6341 40%

Silane-based sealing agent for concrete.  
✓ Effective protection against water and salt damage  
✓ Deep penetration capacity in concrete  
✓ Permeable  
3062025 – 25L

## Silane DC 6683

Waterbased silane/siloxane solution that is used for the sealing of mineral facade surfaces and concrete.  
302025 – 25L

## Naturacoat SC 20

A patented environmentally adapted polysaccharide-based anti-graffiti coating that can be used on most types of absorbent surfaces, including brick, concrete, granite, sandstone, limestone, plaster etc.  
306015 – 15L

## Textile Protection

Fabric Protector is a breathable, Ready-To-Use coating that forms a long lasting, durable, hygienic barrier on textiles and fabrics. The treated surface becomes dirt and stain resistant and allows for easy removal of soils and staining such as coffee and red wine while extending the life of the surface without affecting fabric texture. The treated surface needs only to be cleaned with a cloth and warm water.  
297005 – 5L  
3871051 – 0,5L

## Experts in cleaning agents for the professional market

We have one of the market's widest product ranges – and with many years of experience in both development, production and sales of effective cleaning products – which we sell to the European market. The head office is in Sweden, with sales offices in Denmark and Norway as well as an extensive network of dealers.

### Philosophy

Blue & Green aims to deliver products of the highest quality at the right price - with the least possible environmental impact. We have a great focus on the environmental impact when we develop and produce our product range. It is important to us that our products are efficient in our customers application with the least environmental impact.

That is why we have several different environmental labels on a large part of our products and that we are ISO certified. At the same time we are connected to the Swedish circular packaging system, as we think it is crucial to recycle our packaging so that our products impact to the environment has as little impact as possible.
