

# SAFETY DATA SHEET

| SECTION 1: Identification of the substance/mixture and of the company/undertaking       |
|---|
| 1.1. Product identifier   |
| Trade name  |
| Glass Cleaner   |
| Product no.   |
| 286   |
| Unique formula identifier (UFI)   |
| T1Q5-5X3E-V99C-T78D   |
| 1.2. Relevant identified uses of the substance or mixture and uses advised against      |
| Relevant identified uses of the substance or mixture                                    |
| Cleaning liquid   |
| Uses advised against  |
| No special  |
| 1.3. Details of the supplier of the safety data sheet                                   |
| Company and address   |
| Blue & Green AB   |
| Stenorsvägen 52   |
| 261 44 Landskrona   |
| Sweden  |

Upon breathing difficulties or irritation of the respiratory tract: Bring the person into fresh air and stay with him/her.

#### **Skin contact** Upon irritation: rinse with water. In the event of continued irritation, seek medical assistance. **Eye contact** Upon irritation of the eye: Remove contact lenses. Flush eyes immediately with plenty of water or isotonic water (20-30°C) for at least 5 minutes and continue until irritation stops. Make sure to flush under upper and lower eyelids. If irritation continues, contact a doctor. Continue flushing during transport. Ingestion Provide plenty of water for the person to drink and stay with him/her. In case of malaise, seek medical advice immediately and bring the safety data sheet or label from the product. Do not induce vomiting, unless recommended by the doctor. Have the victim lean forward with head down to avoid inhalation of- or choking on vomited material. **Burns** Rinse with water until pain stops then continue to rinse for 30 minutes. 4.2. Most important symptoms and effects, both acute and delayed This product contains substances, which may cause irritation upon exposure to skin, eyes or lungs. Exposure may result in an increased absorption potential of other hazardous substances at the area of exposure. 4.3. Indication of any immediate medical attention and special treatment needed IF exposed or concerned: Get immediate medical advice/attention. Information to medics Bring this safety data sheet or the label from this product. SECTION 5: Firefighting measures 5.1. Extinguishing media Suitable extinguishing media: Alcohol-resistant foam, carbon dioxide, powder, water mist. 5.2. Special hazards arising from the substance or mixture Fire will result in dense smoke. Exposure to combustion products may harm your health. Closed containers, which are exposed to fire, should be cooled with water. Do not allow fire-extinguishing water to enter the sewage system and nearby surface waters. If the product is exposed to high temperatures, e.g. in the event of fire, dangerous decomposition compounds are produced. These are: Carbon oxides (CO / CO2). **5.3. Advice for firefighters** Wear self-contained breathing apparatus and protective clothing to prevent contact. Upon direct exposure contact The National Poisons Information Service (dial 111, 24 h service) in order to obtain further advice. **SECTION 6: Accidental release measures** 6.1. Personal precautions, protective equipment and emergency procedures Storages not yet ignited must be cooled by water mist. Remove flammable materials if conditions allow it. Ensure sufficient ventilation. **6.2. Environmental precautions** Avoid discharge to lakes, streams, sewers, etc. 6.3. Methods and material for containment and cleaning up Limit spillage and collect using granular absorbent or similar materials, and dispose of it in accordance with the regulations on dangerous waste. Use sand, earth, vermiculite, diatomaceous earth to contain and collect non-combustible absorbent materials and place in container for disposal, according to local regulations. To the extent possible cleaning is performed with normal cleaning agents. Avoid use of solvents. **6.4. Reference to other sections** See section 13 on "Disposal considerations" in regard of handling of waste. See section 8 "Exposure controls/personal protection" for protective measures. **SECTION 7: Handling and storage** 7.1. Precautions for safe handling

Ground and bond container and receiving equipment. Use explosion-proof [electrical / lighting / ventilating] equipment. Use non-sparking tools. Take action to prevent static discharges. The product should be tested for peroxides before distillation or evaporation and tested for peroxide formation or discarded after 1 year. Peroxide formation may be present anywhere in the container, including the sides, bottom, exterior and threaded cap. Peroxide formation in ppm concentrations may not be visually observable and must be identified through the use of appropriate testing procedures. If any of the following conditions exist, the material may be explosively unstable and will require stabilization prior to use: 1. Material appears to be degraded and or contaminated. 2. Material appears to be discolored. 3. Deterioration or distortion of storage container. 4. Thermal shock (sunlight). 5. Age of material exceeds recommended storage time. Smoking, drinking and consumption of food is not allowed in the work area. See section 8 "Exposure controls/personal protection" for information on personal protection. 7.2. Conditions for safe storage, including any incompatibilities Store in tightly closed containers and store protected from moisture and light. Containers should be dated when opened and tested periodically for the presence of peroxides. Do not exceed storage time limits. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Take action to prevent static discharges. Must be stored in a cool and well-ventilated area, away from possible sources of ignition. **Recommended storage material** Always store in containers of the same material as the original container. Storage temperature Dry, cool and well ventilated **Incompatible materials** Strong acids, strong bases, strong oxidizing agents, and strong reducing agents. 7.3. Specific end use(s) This product should only be used for applications quoted in section 1.2 SECTION 8: Exposure controls/personal protection 8.1. Control parameters propan-2-ol Long term exposure limit (8 hours) (ppm): 400 Long term exposure limit (8 hours) (mg/m<sup>3</sup>): 999 Short term exposure limit (15 minutes) (ppm): 500 Short term exposure limit (15 minutes) (mg/m<sup>3</sup>): 1250 2-butoxyethanol Long term exposure limit (8 hours) (ppm): 25 Long term exposure limit (8 hours) (mg/m<sup>3</sup>): 123 Short term exposure limit (15 minutes) (ppm): 50 Short term exposure limit (15 minutes) (mg/m<sup>3</sup>): 246 Annotations: BMVG = Biological Monitoring Guidance Value exists Sk = Can be absorbed through the skin and lead to systemic toxicity. Professional users are subjected to the legally set maximum concentrations for occupational exposure. See occupational hygiene limit values above.

#### Appropriate technical measures

The formation of vapours must be kept at a minimum and below current limit values (see above). Installation of a local exhaust system if normal air flow in the work room is not sufficient is recommended. Ensure emergency eyewash and -showers are clearly marked.

| 9.2. Other information       |  |
| Other physical and ch        | emical parameters  |
| No data available            |  |
| SECTION 10: Stability and    | reactivity   |
| 10.1. Reactivity             |  |
| No data available            |  |
| 10.2. Chemical stability     |  |
| The product is stable        | e under the conditions, noted in section 7 "Handling and storage". |
| 10.3. Possibility of hazard  | lous reactions   |
| No special                   |  |
| 10.4. Conditions to avoid    |  |
| Avoid static electrici       | ty.  |
| 10.5. Incompatible mater     | rials  |
| Strong acids, strong         | bases, strong oxidizing agents, and strong reducing agents.        |
| 10.6. Hazardous decompo      | osition products   |
| The product is not d         | legraded when used as specified in section 1.                      |
| SECTION 11: Toxicological    | information  |
| 11.1. Information on haz     | ard classes as defined in Regulation (EC) No 1272/2008             |
